

Ahmad Salih

Software Engineer (Frontend developer)

About Me

Summary

Ahmad is experienced frontend developer with a strong background in ReactJS and modern web development technologies. Proficient in technologies such as ES6+ (Typescript), GatsbyJS, Pug/Jade, Sass, Webpack, Vite, and much more. Also Experienced in Backend technologies like NodeJS, ExpressJS, MongoDB, SQL, PostgreSQL. And he has hands-on building CI/CD pipelines with Docker and tools such as Circle CI, Travis CI, and GitHub Actions.

Now he is looking for a challenging role, Where he can *utilize* his skills and continue learning and growing as a developer.

Technical Experience

Projects

Fullcart (e Commercial platform)

<https://github.com/salihcodev/fullcart>

A Platform that helps people to sell their products online.

Key features

- Achieved *authorizing/authenticating* for users.
- Built role system for the users' *customers/suppliers*
- A Hot list for *searching* whole products Also *shows suggestions* about trending searches.
- Implemented a *fully functional dashboard* to make every supplier *manage* their products.
- Shop page that has *popular* products and *suggestions* for the customer (*recommendations*).
- A *pre-Made* supplier profile and represented as '*the company website*'.
- Cart, wish list and checkout page.
- Developed a notifications system to respond to orders and anything else that should be notified. *WIP*
- Chat to keep in touch with your order. *WIP*
- Built single product page that contains *full details, reviews (categorized reviews), and basic supplier info*.

Reactjs Redux Typescript Expressjs MongoDB Docker

Achievements

Courses

- **Software Design and Architecture Specialization** Coursera
 - Object-Oriented Design (Dec. 2021)
 - Design Patterns (WIP)
 - Software Architecture (WIP)
 - Service-Oriented Architecture (WIP)
- **Programming with Google Go Specialization** Coursera
 - Getting started with go (Nov. 2021)
 - Function, methods, and interfaces in go (Dec. 2021)
 - Concurrency in go (Dec. 2021)
- **NestJS Zero to Hero - Modern TypeScript Back-end Development** Udemy (Jan. 2023)

Work Experience

Employment

- **Military** *Military service life time* Jan – 2022 : Mar – 2023
 - Fullstack developer**
Played full role, I built quite several projects, front&back end. Most of the time I was dealing with MSSQL server, Sqlite on top of NodeJS, and React.js.
 - **Office Archive App** – Worked on full functional archive can *CRUD* fax, And view some managerial stuff also. All that depends on *year, stage, and fax title* or *soldier name*.
 - **Leader Assistant** – Developed an app helps the leader to assign orders, track requests, and can response back for requests *approve, wait* or just *delete* it quitely.
 - **Solider Examiner** – Rebuilt exam app, which has questions that helps to measure Psychological, Sexual, and religious deviations.
 - **Interview Panel** – Built a dashboard to *View, Collect, Edit, and Delete* soldier profile.

Web Designer

- Learned some additional communication skills.
- Achieved some progress in backend technologies, Because I needed it to finish some projects.
- Became aware of UI & UX more than in the beginning.
