

Ahmad Salih

Software Engineer (Frontend developer)

About Me

Summary

Ahmad is an experienced frontend developer with a strong background in ReactJS and modern web development technologies. Proficient in technologies such as ES6+ (Typescript), GatsbyJS, Pug/Jade, Sass, Webpack, Vite, and much more. Also Experienced in Backend technologies like NodeJS, ExpressJS, MongoDB, SQL. And he has hands-on building CI/CD pipelines with Docker and tools such as Circle CI, Travis CI, and GitHub Actions.

Now he is looking for a challenging and pushing forward role, Where he can *utilize* his skills and continue learning and growing as a developer.

Technical Experience

Projects

Fullcart (e Commercial platform) WIP

<https://github.com/salihcodev/fullcart>

A Platform that manage people to sell their products online.

Key features

- Achieved *authorizing/authenticating* for users.
- Made a dynamic categories list that can handle countless number of categories.
- Designed *role* system for the users *customers/suppliers*
- A Hot list for *searching* whole products Also *shows suggestions* about trending searches.
- Implemented a *fully functional dashboard*.
- Shop page that has *popular* products and *suggestions* for the customer (*recommendations*).
- The app has cart, wish list and checkout page.
- Developed a notifications system to respond to orders and anything else that should be notified.
- Chat to keep in touch with your order.
- Built single product page that contains all product information.

Reactjs Redux Typescript Expressjs MongoDB Docker

Work Experience

Employment

- **Military** *Military service life time* Jan – 2022 : Mar - 2023
Fullstack developer
Played full role, I've handled more than 20 mindsets, Developed quite several projects, front&back end. Most of the time I was dealing with MSSQL server, Sqlite on top of NodeJS, and Reactjs.
 - **Office Archive App** – Worked on full functional archive can *CRUD* fax, All that depends on the year, stage, and fax title or soldier name.
 - **Leader Assistant** – A LAN-based app for the leader to assign orders, track requests, and respond back for requests to *approve*, *wait* or just *delete* it quitely.
 - **Solider Examiner** – Recreated exam app, which has three types of questions that helps to measure Psychological, Sexual, and religious deviations.
 - **Interview Panel** – Built a dashboard that searches efficiently at ~125k recorder to *View*, *Collect*, *Edit*, and *Delete* the soldier profile.

upwork.com 

Web Designer

- Extended my experience in backend technologies such as NodeJS, ExpressJS, NestJS, MongoDB
- Became aware of UI & UX, Which I worked on almost ~30 freelancing task

Education

Academic

UNIVERSITY OF SADAT CITY

2017 – 2021

law.usc.edu.eg/ar 

Law student
