

# Ahmad Salih

Software Engineer (Frontend developer)

## About Me

Summary

Ahmad is experienced frontend developer with a strong background in ReactJS and modern web development technologies. Proficient in technologies such as ES6+ (Typescript), GatsbyJS, Pug/Jade, Sass, Webpack, Vite, and much more. Also Experienced in Backend technologies like NodeJS, ExpressJS, MongoDB, SQL, PostgreSQL. And he has hands-on building CI/CD pipelines with Docker and tools such as Circle CI, Travis CI, and GitHub Actions.

Now he is looking for a challenging role, Where he can *utilize* his skills and continue learning and growing as a developer.

## Technical Experience

Projects

### Fullcart [🔗](#) ( e Commercial platform)

<https://github.com/salihcodev/fullcart> [🔗](#)

A Platform that helps people to sell their products online.

Key features :

- Achieved *authorizing/authenticating* for users.
- Built role system for the users' *customers/suppliers*
- A Hot list for *searching* whole products Also *shows suggestions* about trending searches.
- Implemented a *fully functional dashboard* to make every supplier *manage* their products.
- Shop page that has *popular* products and *suggestions* for the customer (*recommendations*).
- A *pre-Made* supplier *profile* and represented as '*the company website*'.
- Cart, wish list and checkout page.
- Developed a notifications system to respond to orders and anything else that should be notified. *WIP*
- Chat to keep in touch with your order. *WIP*
- Built single product page that contains *full details, reviews (categorized reviews), and basic supplier info*.

Reactjs   Redux   Typescript   Expressjs   MongoDB   Docker

## Achievements

Courses

- **Software Design and Architecture Specialization** [🔗](#) Coursera
  - Object-Oriented Design (Dec. 2021)
  - Design Patterns (WIP)
  - Software Architecture (WIP)
  - Service-Oriented Architecture (WIP)
- **Programming with Google Go Specialization** [🔗](#) Coursera
  - Getting started with go (Nov. 2021)
  - Function, methods, and interfaces in go (Dec. 2021)
  - Concurrency in go (Dec. 2021)
- **NestJS Zero to Hero - Modern TypeScript Back-end Development** [🔗](#) Udemy (Jan. 2023)

## Work Experience

Employment

- **Military** *Military service life time* Jan – 2022 : Mar - 2023  
[External resource](#) [🔗](#)  
**Fullstack developer**  
*Played full role, I built quite several projects, front&back end. Most of the time I was dealing with MSSQL server, Sqlite on top of NodeJS, and React.js.*
  - **Office Archive App** – Worked on full functional archive can *CRUD* fax, And view some managerial stuff also. All that depends on *year, stage,* and *fax title* or *soldier name*.
  - **Leader Assistant** – Developed an app helps the leader to assign orders, track requests, and can response back for requests *approve, wait* or just *delete* it quitely.
  - **Solider Examiner** – Rebuilt exam app, which has questions that helps to measure Psychological, Sexual, and religious deviations.
  - **Interview Panel** – Built a dashboard to *View, Collect, Edit,* and *Delete* soldier profile.
