# Ahmad Salih
*Software Engineer* (Frontend developer)

## About Me
Summary

Ahmad is experienced frontend developer with a strong background in ReactJS and modern web development technologies. Proficient in technologies such as ES6+ (Typescript), GatsbyJS, Pug/Jade, Sass, Webpack, Vite, and much more. Also Experienced in Backend technologies like NodeJS, ExpressJS, MongoDB, SQL, PostgresqL. And he has hands-on building CI/CD pipelines with Docker and tools such as Circle CI, Travis CI, and GitHub Actions.

Now he is looking for a challenging role at **Valeo** where he can *utilize* his skills and continue learning and growing as a developer.

## Technical Experience
Projects

### Fullcart ☐ ( e Commercial platform)

https://github.com/salihcodev/fullcart ☐

*A Platform that helps people to sell their products online.*

*Key features :*

- Achieved *authorizing/authenticating* for users.
- Built *role* system for the users' *customers/suppliers*
- A Hot list for *searching* whole products Also *shows suggestions* about trending searches.
- Implemented a *fully functional dashboard* to make every supplier *manage* their products.
- Shop page that has *popular* products and *suggestions* for the customer *(recommendations)*.
- A *pre-Made* supplier *profile* and represented as *'the company website'*.
- Cart, wish list and checkout page.
- Developed a notifications system to respond to orders and anything else that should be notified. *WIP*
- Chat to keep in touch with your order. *WIP*
- Built single product page that contains *full details, reviews (categorized reviews), and basic supplier info*.

Reactjs   Redux   Typescript   Expressjs   MongoDB   Docker
