PROFILE

A Frontend developer who is working on different types of projects. I enjoy figuring out tricky UI problems and making apps run smoothly—it's satisfying when you can transform something slow and frustrating into something fast and easy to use.

Simply put, I build interfaces that people love to use.

EXPERIENCE

WeCodeForYou, London, UK — Sr. Frontend Engineer

Oct 2024 – Present

- Built responsive web apps serving 500+ daily users
- Implemented 6+ UI features quarterly with design and backend teams
- Cut bundle size by 35% via lazy loading and webpack
- Established reusable components across 3+ projects, saving 25% of development time.
- Developed "Food Manager", an F&B platform with POS, inventory, and order management.
- Integrated POS system for seamless transactions.
- Built inventory management for stock tracking.
- Added order management for efficient processing.
- Implemented multi-level category management for menu items and recipes.
- Supported complex food and beverage business needs.
- Designed real-time sales analytics dashboards.
- Enabled data-driven decisions for restaurant owners.
